

Protect your home with Floodguards

Now is the time to ensure that your home or property is guarded against flooding, by purchasing a floodguard, air brick cover or flood alarm, which works like a burglar alarm to alert the home or business owner of flooding.

Uisce Technology Ltd. is a Kilkenny-based company, which offers a number of solutions for flooding. With the widespread flooding experienced in County Roscommon last November, there are many homes and premises in the region that would benefit from the products currently offered by Uisce Technology.

They have sump and pump solutions and magic gel for protecting electricity boxes, as well as the patented Floodguard design, which works like a dam under pressure and continues working regardless if the flood water is still, flowing or creating waves. It takes about 30 seconds to clip on a floodguard but it could make a big difference in terms of protecting your home.

Uisce Technology has been up and running for six years but the Floodguard branch of the company has been in operation for the past year. Their flooding solutions are ideal for homes and businesses.

The Floodguard system developed by Uisce Technology is a unique globally-patented design. Their flood prevention systems have the British Standards Institution (BSI) Kitemark Licence and have also been approved for the ISO Quality Standards.

For further information, contact Uisce Technology at www.floodguards.ie

Floodguards®

Remember the damage the rain and floods caused last year?

Well this year don't get caught out, be prepared and protect your business and home in advance with Flood Prevention Barriers from Uisce Technology

- It takes about 30 seconds to clip on a Floodguard.
- A Floodguard works like a dam under pressure and continues working regardless if the water is still, flowing or creating waves.
- Floodguards are ideal for protecting your home and business.
- Unique Globally Patented Design. Our Flood Prevention Systems have the British Standards Institution (BSI) Kitemark Licence PAS1188: 1 and 2 approved and also have achieved the Quality Standards ISO9001, 14001 and 18001 Awards. It's the only British standard approved Flood Prevention system on the market for Domestic and Commercial applications.
- Uisce Technology Ltd supply and install a range of Floodguards products tailored to suit the needs of the customer.
- Other products in our Flood Prevention range include: Airbrick covers, Flood alert monitoring system to protect your property and Rapid-dam for larger premises.
- Our website is www.floodguards.ie
