

Cost-effective hygiene solutions from Anya Products

Save your business money with the Vendor Hygiene System from Anya Products, Ballymurray, Roscommon. Are you paying for rented cotton towels every week that are not fully used? Well there's no need to pay any more because with the continuous Vendor system, you only pay for what is used. By using Vendor Systems, the towel cassette can be replenished at any time, therefore ensuring that the towel never runs out, as often happens during your busiest period.

With 375 hand dries per fill, compared to approximately 200 for the standard 40-metre cotton towel, there are considerable savings to be made. Also, compared to folded paper hand towels, it means there is no unsightly waste paper basket with paper strewn all over the floor as well as towels thrown down the toilet bowl, blocking your sewerage system.

The Vendor System supplied by Anya Products also offers the utmost hygiene benefits because of the one use only per pull and the fact that clean and soiled towels are stored in separate compartments. The risk of swine flu infection and the spread of other harmful bacteria is also eliminated by the Vendor System when compared to the air dryer system, which blows and circulates the air throughout the washroom area. Anya Products also supply Scrim reinforced towel rolls to suit the standard existing towel cabinet, as well as the towel cabinet itself.

Anya Products is a family owned and operated business, which places great emphasis on the personal service given to all customers. Mick Reynolds has over 30 years experi-

ence in contract cleaning and the supply of hygiene products to all industries, institutions and hospitality businesses. Anya Products is also the premier supplier of industrial wipes nationwide.

Mick believes that the Vendor system is the most advanced hand drying system. Bacteria causing swine flu and other bacteria are eliminated and the Vendor system is far more hygienic than traditional cotton towel be-

cause it is used only once.

In order to assess the environmental effects of its products, Vendor regularly has life cycle analyses carried out by specialised research agencies. Research from research institute PRÉ Consultants (2008) has shown that one pull of the Vendor towel cassette is less harmful to the environment than one pull of a traditional cotton towel roll. A choice for Vendor is therefore a responsible choice.

There are also no paper towels strewn over the floor, which can block toilets and there is no air blower spreading bacteria around the washroom area. All of this means that there is less time spent cleaning the washroom area, saving you even more money!

Phone or email Mick Reynolds for a no-obligation demonstration. Telephone (090) 66 61892 or (086) 3891139 or email sales@anyaproducts.com.

Hygienic: One time use. Always a clean fresh towel. Clean and soiled towels in separate compartment

Standard Length on Cassettes: 55 or 33 metres

We also supply Scrim reinforced towel rolls to suit the standard existing towel cabinet as well as the towel cabinet itself

YOU ONLY PAY FOR WHAT IS USED ...

☆ Always available ☆ Always clean ☆ Always neat and tidy

Introducing the unique **Vendor Cabinet Towel Dispenser**

AUTOMATIC
The dispenser keeps turning the towel automatically after use, so that hygienic hand-drying is always offered to the next visitor

SENSOMATIC
This 'non-touch' dispenser reacts to a movement of the hand and subsequently supplies a clean towel. After drying, the towel is automatically collected.

CLASSIC
In a classical way this dispenser is used by the visitor manually. As a result of this, electricity is generated and the break is gradual and can be adjusted.
