Finneran on broadband boost

A new European Scheme will ensure that people living and working in rural areas, who have not benefited under the Government's National Broadband Scheme, will be able to get broadband connected to their homes and businesses, according to Minister for Housing and Local Services Michael Finneran TD.

Minister Finneran has received confirmation that the Scheme will be rolled out over the next two years, following the identification of areas that have yet to be broadband enabled later this year. He welcomed the news and said that it will ensure that rural areas are afforded the same access to broadband as other areas.

"A total of €13.413 million is being made available under the European Economic Recovery Plan through the European Agricultural Fund for Rural Development to get broadband to rural areas which have not been covered under the Government's National Broadband Scheme. This fund will be administered under the Department of Agriculture, Fisheries and Food under the Rural Development Plan."
