

Discover the power of truly effective 21st century skin care!

Have you ever thought, "Where can I find a skincare that delivers results I can actually touch, see and measure?" Well now you can find that elusive result at Beauty Secrets Skin, Laser & Body Clinic, St. Alban's Place, Roscommon.

The TeN research laboratories in Bergamo, Italy, by combining the power of natural ingredients with the latest advances in the science of skincare (exclusive to the TeN Skin Care Laboratories who have created their own amazing formulas), have succeeded in creating a skincare line that delivers outstanding results that you can touch, see and measure. And it works equally well on all skin types and conditions. Sole distributors of TeN skin care in Ireland, north and South is The Institute of Beauty, email beautyinstitute@eircom.net, telephone (045) 442496.

These formulas, treatments and retail products are exclusive to the TeN Skin Care Laboratories, which are among the largest in Europe. Constant freshness and latest-generation advances are assured through a comprehensive programme of research and development partnered with the University of Bergamo.

The facial treatments from TeN cater for all of the areas of concern that our clients talk to us about, hydration, moisturising, calming, anti ageing, and more.

The launch of TeN at Beauty Secrets Skin, Laser & Body Clinic in Roscommon will feature the amazing new Filler Facial and home-care products as well as the

treatment that is getting a hugely positive response from clients everywhere – TeN Luminous Facial Treatment. The filler method treatment is specifically for women who have said no to plastic surgery or invasive treatments using needles.

This revolutionary treatment literally rebuilds the architecture of the face using the latest scientific advances, natural plant extracts and vitamins, all of which combine to help your skin regenerate its own filler, thus minimising lines and wrinkles without needles or surgery.

The Luminous Method Treatment is suitable for all skin types and dramatically reduces the appearance of dark spots and

brightens skin that has become dull due to the effects of weathering, age and the environment.

This natural result of ageing is almost literally reversed and the skin immediately appears younger, smoother and brighter. All of the TeN Skin Care Treatment/Facials are matched with take-Home products, which help clients continue the effect of the treatment.

So when your therapist has amazed you with the immediate results of the facial, you can prolong and extend these results with homecare products, which your therapist can recommend.

Further, all of these take-home products are packed with sample or trial sizes of complementary items, such as a serum and a mask that will allow you to make the most of your home care. These complementary items are always free and always exactly the right

ones to match your cream, serum or whatever item you have chosen.

No other skin care company takes such care to ensure that you always have everything you need to maximise results at such a reasonable cost. You are invited to experience these new facials for yourself, and Denise at Beauty Secrets Skin, Laser & Body Clinic in Roscommon is giving away treatments and products worth €2000 to the winners of our competition which is exclusive to *Roscommon People*.
